REMARKS

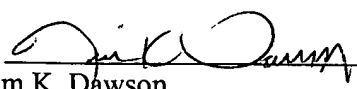

A telephone interview was accomplished with Examiner John H. Le on October 27, 2005. In response, the formal written reply to the last Office Action (dated August 1, 2005) was mailed October 31, 2005, prior filing this reply.

Continuation of Substance of Interview including description of the general nature of what was agreed to if an agreement was reached, or any other comments: Applicant argues that the prior did not teach "measuring delay spacings between said plurality of clock signal edges". Examiner position is that the previous cited prior art teach measuring delay spacings between said plurality of clock signal edges (Col.4, lines 19-40). Applicant was agree to amend claim 1, in line 3, inserted --within a reference clock period-- after "plurality of clock signal edges", which is overcome the previous cited prior art; however, the new limitations require further search.
